

LABOR CATEGORY DESCRIPTIONS

SIN 132-51

Commercial Job Title: Engineer

Functional Responsibility: Designs, develops, enhances, tests, debugs, and maintains software and hardware using a systematic quantifiable approach. Effectively documents system status and any changes implemented to include the use of block diagrams, flowcharts, and user-level and program-level documentation. Analyzes business applications and design specifications; and recommends improvements in their efficiency. Provides technical support and direction to programmers to ensure tasks are completed on schedule.

Minimum/General Experience: 4 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Sr. Network Engineer

Functional Responsibility: Analyzes current network configurations and performs cost/benefit studies for proposed enhancements. Directs the testing and installation of systems into the network. Monitors network to ensure proper configuration and operations. Identifies problems proactively and repairs issues as they arise. Informs users of system requirements and limitations. Oversees support staff.

Minimum/General Experience: 5 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: IT Specialist I

Functional Responsibility: Determines current and future equipment requirements based on customer's needs. Coordinates full-cycle IT materials management including acquisition, inventory, installation, issuance, and disposal of equipment. Ensures inventory is current and that equipment is available when needed for installation.

Minimum/General Experience: 5 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Analyst / Database Manager

Functional Responsibility: Provides technical expertise in the use of Database Management Systems (DBMS). Responsible for defining file organization, indexing methods, and security procedures for specific applications. Evaluates and recommends DBMS products and solutions for user requirements.

Minimum/General Experience: 2-4 years of relevant experience

Minimum Education: Associate's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Network Engineer

Functional Responsibility: Analyzes current network configuration and assists with cost/benefit studies for proposed enhancements. Participate in the testing and installation of the systems into the network. Monitors network to ensure proper configuration and operations. Identifies problems proactively and repairs issues as they arise. Informs users of system requirements and limitations.

Minimum/General Experience: 2-4 years of relevant experience

Minimum Education: Associate's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: IT Systems Administrator

Functional Responsibility: Monitors, maintains, and optimizes business systems to meet resource utilization and capacity. Provides technical support to users in the use of, and access to, these systems.

Minimum/General Experience: 2 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Sr. Software Engineer

Functional Responsibility: Designs, writes, tests, and debugs code for software components, units, and modules that meet product specification and development schedules. Participates in large system and subsystem planning. Adheres to product build and release schedules and strategies. Acts as a technical resource for lower-level developers.

Minimum/General Experience: 6-8 years of relevant experience.

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Software Engineer III

Functional Responsibility: Conducts tests, identifies and debugs problems, and assists in the design and coding software products. Prepares comprehensive test plans and recommends solutions to senior developers. Writes product and user documentation.

Minimum/General Experience: 4-6 years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Consultant

Functional Responsibility: Will develop, document and deliver test plans that are consistent with Customer documents and provide technical support for the modeling/testing of applications with external system dependencies, coordination with other government entities and implementation of customer relationship management system prior to inclusion in the Customer's environment. Deploy of web pages for approval; identification and establishment of metrics; providing customer support, process improvement and IT service-related documentation.

Minimum/General Experience: 2-4 years of relevant experience

Minimum Education: Associate's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Web Developer

Functional Responsibility: Designs, develops, troubleshoots, debugs, and implements software code (such as HTML, CGI, and Javascript) for components of the website in support of Information Technology (IT) projects. Works with graphic designers and other members of a project team to develop the site concept, interface design, and architecture of the website. Responsible for interface implementation. Requires strong navigation and site design instincts. Knowledgeable in web development methodology to include testing.

Minimum/General Experience: 4 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Software Engineer II

Functional Responsibility: Participates in the analysis and development of test plans. Tests components and units and provides recommended corrections to senior developers. Assists in the design and coding of software components, units, and modules.

Minimum/General Experience: 2-4 years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Software Engineer

Functional Responsibility: Under the supervision of senior engineers, assists in the design and coding of software components, units and modules. Participates in the analysis and development of the test plans.

Minimum/General Experience: 0-2 years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Jr. Programmer

Functional Responsibility: Assists Application Engineers and Programmers in translating software requirements and design specifications into code. Integrates and tests software components. Participates in the design of software tools.

Minimum/General Experience: 0-2 years of relevant experience

Minimum Education: Associate's degree in an IT or related discipline (engineering, math, science or computer science)

Commercial Job Title: Technician IV

Functional Responsibility: Analyzes and documents current network configuration and user requirements. Designs and implements network topologies based on needs. Develops new hardware requirements and prepares for acquisition. Organizes hardware installation and prepares site installation and test reports. Coordinates post-installation operations and maintenance support.

Minimum/General Experience: 4 or more years of relevant experience

Minimum Education: Bachelor's degree in an IT or related discipline (engineering, math, science or computer science)
